Modern  
Cooking  
Solutions

Clean  
Household  
Energy

Reliable  
Drinking Water  
Services

### LIVELIHOOD IMPROVEMENTS

- Cost and time savings
- Improved job opportunities
- Healthier living
- Access to education opportunities

### SCALE MONETISATION OF EXTERNALITIES

- Carbon credits
- Health and Gender impact
- Time and cost savings

### WOMEN'S EMPOWERMENT

- **Primary:** Improved access to basic goods and services
- **Secondary:** Women-led and owned business and equitable workforce and supply-chain
- 2X Challenge compliance

### ENVIRONMENT & CLIMATE ACTION

- Reduced GHG emissions and lower air pollution through behaviour changes and improved technologies
- Reduced deforestation

# SOCIETAL ECONOMIC ECOLOGICAL IMPACT—

A more sustainable, inclusive and prosperous Global South that achieves Gender Equality and contributes to the global fight to Climate whilst contributing to the economic development of social enterprises and their un(der) served clients.

## bix2 THEORY OF CHANGE

Billions of un(der)served in the Global South lack access to modern products, services and solutions that could improve their livelihood, such as clean energy, modern cooking and safe drinking water. Social enterprises addressing these markets struggle with lack of access to working capital. At the same time, these social enterprises and their

customers realise significant impact when such products and services are scaled. Several types of donors and corporates are willing to pay for such impact when realised (outcome-based-finance) and investors do not take into account the future value of these externalities when financing SMEs.

BIX2 offers Impact Receivables Finance in Sub-Saharan Africa and Southeast Asia to SMEs that target un(der) served populations in order to Improve Livelihoods for primarily women and children and contribute to Climate Change adaptation and mitigation measured by quantifiable contributions to the global Development Agenda (SDGs).
